August 2026

THE WATER COOLER

The PEPM Group had the opportunity to bring our team together for a family day at Gathering Place in Tulsa, Oklahoma! Employees from both our Tulsa and Fayetteville offices, along with their families, joined us for an afternoon of great food and fun. At PEPM, we know that our success is made possible not only by the dedication and hard work of our employees, but also by the families who support them every step of the way. We are incredibly grateful for our team and loved having the chance to celebrate them outside of the workplace. Thank you to everyone who joined us and helped make it such a memorable day. We are already looking forward to the next one!

The PEPM Group is excited to kick off another industrial structural engineering project in Oklahoma! Our team will be using 3D scanning, structural analysis and engineering, and detailed design for an operating industrial facility. Projects like this are a great example of how field data and practical engineering come together to solve real-world challenges in existing facilities.

The PEPM Group is beginning a new project engineering and project management support partnership with a major industrial manufacturer in Arkansas. Our team will be providing hands-on support for a variety of plant projects, helping take initiatives from early scope development through engineering and execution. The work will include project engineering, contractor coordination, project planning, equipment and facility specifications, drawing development, 3D scanning, as built drawings and multidisciplinary engineering support as needs arise. We're proud to have the opportunity to work alongside our customer's team and to support our customers continued growth.

WE ARE HIRING!

For a long-term fulfilling career, a caring, encouraging, and respectful workplace, contact PEPM. Apply today at www.pepmgroup.com/careers

- **Senior Mechanical Engineer** (Fayetteville, AR), 10+ years of proven mechanical, plumbing, and HVAC engineering and design experience in the food and beverage facilities, strong understanding of USDA, FDA, OSHA, ASHRAE, and ASME codes, standards, and guidelines, strong understanding of specifications and excellent attention to detail, B.S. in Mechanical Engineering, PE in Mechanical Engineering
