THE WATER COOLER

The PEPM Group has received the 2026 Arkansas Governor's Award for Excellence in Global Engineering Services! This prestigious award reflects PEPM Group's dedication to supporting our customers' global expansion, growing export sales, and contributing to Arkansas's economic development, helping create jobs and new opportunities. This achievement reflects the exceptional work of our entire team. This recognition marks an important milestone for our company. We are deeply grateful to our customers, partners, and friends. Your continued support has played a vital role in making this possible. Thank you for being part of our success!

The PEPM Group is excited to begin another major EPCM project supporting the development of a new advanced manufacturing facility in Tulsa, Oklahoma for a global company. The project includes the renovation and redevelopment of an existing facility to accommodate new production, warehouse, office, and laboratory operations. This multi-phase project will bring together PEPM Group's civil, structural, mechanical, electrical, instrumentation and controls, and project management expertise. Our team will provide detailed full engineering and design, 3D scanning and 3D modeling, procurement support, construction management, commissioning support, and project closeout services. The project is expected to span more than a year, progressing from detailed engineering and procurement through construction, commissioning, testing, startup, and final closeout. This comprehensive scope provides an exciting opportunity for our discipline engineers to work together throughout the full project lifecycle.

The PEPM Group congratulates Jeff Cartwright, PE, Lead Electrical Engineer, and Kelley Flanagan, Project Engineer, as they traveled to Poland for an important international project assignment. During their visit, Jeff and Kelley gathered critical project information, collaborated directly with the client and site personnel, and developed a deeper understanding of the facility's operational and technical requirements. Their onsite involvement will help strengthen coordination and ensure that PEPM's engineering solutions align with the client's goals and real-world operating needs. This trip reflects PEPM's continued commitment to hands-on engineering, international collaboration, and exceptional client service.

WE ARE HIRING!

For a long-term fulfilling career, a caring, encouraging, and respectful workplace, contact PEPM. Apply today at www.pepmgroup.com/careers

- **Senior Mechanical Engineer** (Fayetteville, AR), 10+ years of proven mechanical, plumbing, and HVAC engineering and design experience in the food and beverage facilities, strong understanding of USDA, FDA, OSHA, ASHRAE, and ASME codes, standards, and guidelines, strong understanding of specifications and excellent attention to detail, B.S. in Mechanical Engineering, PE in Mechanical Engineering
- **Process Engineer/Project Engineer - Food Processing** (Fayetteville, AR), Bachelor's degree in Mechanical, Chemical, Industrial, or related engineering, 5+ years of relevant food-processing engineering experience, Experience with conveyor design, equipment layouts, line balancing, and production throughput, Knowledge of sanitary design and food-safety requirements, Strong project management, communication, and problem-solving skills, AutoCAD and Revit experience required, USDA-regulated facility experience is required, Ability to travel to client and project sites as needed

NEW ADDITIONS TO THE PEPM TEAM!

PEPM Group is continuing to grow!

- Steven Hryniewicz, P.E., Senior Mechanical Engineer – Steven is an experienced Mechanical Design Engineer with more than 15 years of engineering and project experience supporting industrial and manufacturing facilities.
- Satish Dharlapudi, Senior Mechanical/BIM Designer – Satish brings more than 15 years of experience in Revit, AutoCAD, and BIM design, with a strong background in MEP coordination and 3D modeling.
- Hernan Bonsembiante Jr., P.E., S.E., Senior Structural Engineer – Hernan has more than 12 years of structural engineering experience, spanning structural analysis and design, special inspections, construction management, and project management.
- Alan Caster, P.E., Senior Civil Engineer – Alan brings a strong background in civil engineering, site development, stormwater management, roadway design, and land surveying.

WE WANT YOUR FEEDBACK!
